

# Going Green

By Joseph Jackson

You can make a difference  
Life speaks for itself  
In our community  
We can spread the wealth  
From planting trees  
And recycling  
We can help our community

Conserving water is a good start  
It will be easy if you took part  
Cars can be bad for our transportation  
Try using a bike for your destination  
Anyone can help from all races and ages  
Even kids through different stages

By uniting as one and sticking together  
We can make our city even better  
Don't use harsh chemicals outside because we care  
That can also affect the air  
Use lights wisely because that can be the key  
For us to reduce the use of energy  
Alexandria as one is a team  
Only you can help us go green
